

Simone Rea

Bologna, Italy

simone.re.24.01@gmail.com — +39 320 068 0442

Education

Eindhoven University of Technology – TU/e
Incoming student accepted in Erasmus Program

Eindhoven, Netherlands
February 2027 – July 2027

Yonsei University
Incoming student accepted in Overseas Program

Seoul, Korea
September 2026 – December 2026

Alma Mater Studiorum – University of Bologna
Bachelor's Degree in Computer Engineering
• Current GPA: 29.11/30 (equivalent to **3.926/4**)

Bologna, Italy
2024 – Present

Istituto Tecnico-Scientifico Ettore Majorana
Traditional Scientific High School Diploma
• Graduated with **100/100 cum laude**

Orvieto, Italy
2019 – 2024

Experience

Biozentrum – University of Basel
Incoming Summer Researcher

Basel, Switzerland
July 2026 – September 2026

ADM Team – Alma Mater Studiorum
Software Engineering Member

Bologna, Italy
November 2024 – November 2025

- Developed backend services in **Go** to implement a DNS system backed by **PowerDNS**.
- Implemented and tested HTTP APIs using **curl** for request validation and debugging.
- Acquired practical knowledge of distributed **system architecture** and service-oriented design.
- Set up **Prometheus** for monitoring, metrics collection, and basic alerting.
- Worked on application **deployment** and environment configuration in Linux-based systems.

Unibo Motorsport
Novice Member – Driverless Department

Bologna, Italy
March 2025 – June 2025

- Collaborated in a multidisciplinary university team.
- Contributed to the Software Infrastructure sub-department by utilizing **C#** and **Unity** to support the development of a driving simulator.
- Designed and implemented a custom control interface for an autonomous robot, leveraging **Python** and **ROS2** to meet specific sponsor requirements.

Projects

- CyberChallenge program
- High School Math Olympics

Certifications

- IELTS Academic – Overall Band Score: 7.5

Technical Skills

Programming Languages: Python, Rust, Java, C++, C, JavaScript, Go, SQL

Web Technologies: HTML, CSS, Node.js

Tools & Software: Unity, Figma, Photoshop, Prometheus

Systems & Concepts: Linux, ROS2, Algorithms, Operating Systems, Computer Networks, POSIX, Proxmox, LDAP
